General advice
Have at least 2 day's rest a week - or more if necessary
Do not train when you are ill or injured
If you need to change your schedule try to keep the same balance of training throughout the week
Have 1 easy week per month

Consider using your bike when commuting
Write down a short term \& long term goal
Record your training activities in a simple training log
Invest in a heart rate monitor
Train in groups for some sessions - particularly the longer/steady sessions
